

MASTERCLASS IN GENERATIVE AI

Learn the art of crafting AI-driven solutions!

Overview

Your Path to Gen AI Mastery

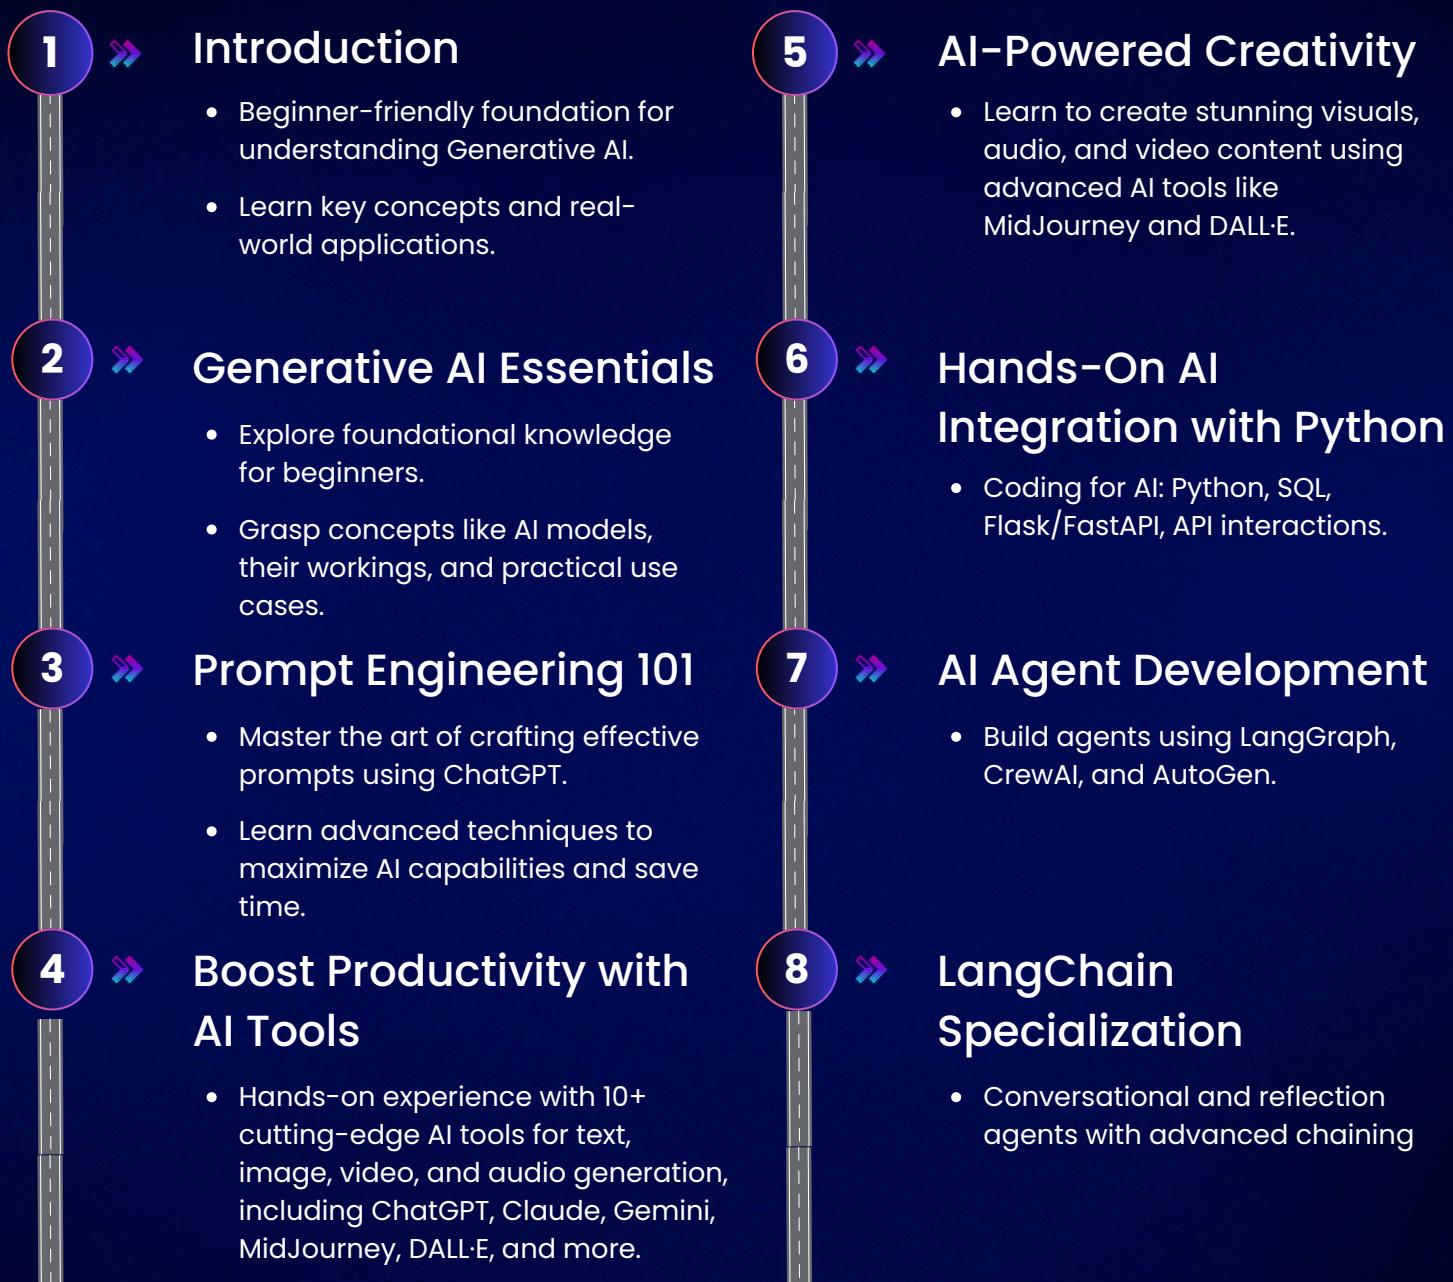

This “Masterclass in Generative AI” is designed to teach you how to leverage Generative AI for practical applications. From mastering AI prompts for writing and coding to creating stunning images and videos , you’ll gain hands-on experience with cutting-edge tools and frameworks, empowering you to integrate AI seamlessly into your work and business.

Key Features:

- Master prompting with 10+ AI tools for diverse use cases.
- Gain hands-on experience by solving business problems with AI.
- Personalized support ensures you succeed in your goals.
- 50+ Hours of Learning Content with life time access

Learning Roadmap

Master AI in 8 weeks with just 10 hours of weekly learning

Tools and Libraries taught in the Curriculum

These tools and libraries provide the foundation for building, deploying, and optimizing generative AI workflows across multiple domains. Let me know if you'd like a deeper dive into any specific tool!

- 1** ➡ **ChatGPT**  A state-of-the-art language model for text generation, summarization, and conversational AI.
- 2** ➡ **Claude**  Advanced conversational AI designed for deep reasoning and large-scale data handling.
- 3** ➡ **Perplexity AI**  AI-powered search engine for advanced information retrieval and summarization.
- 4** ➡ **Google Gemini**  Multimodal AI for integrating text, image, and other data formats for creative and analytical tasks.
- 5** ➡ **Grok**  Educational AI tool for interactive learning and personalized knowledge generation.
- 6** ➡ **MidJourney**  A powerful tool for generating stunning visuals and creative designs using AI art.
- 7** ➡ **DALL·E (OpenAI)**  AI model for generating detailed images from textual descriptions.
- 8** ➡ **Leonardo**  Tool for creating custom AI art and fine-tuning designs based on user preferences.
- 9** ➡ **InVideo**  AI-driven video creation platform for professional-grade video editing and production.
- 10** ➡ **Descript**  Tool for audio and video editing using AI-based transcription and production workflows.
- 11** ➡ **Notebook LLM**  Framework for integrating large language models directly into notebook environments for coding and experimentation.
- 12** ➡ **LangChain**  Framework for building applications with chained tasks and prompts, designed for integrating large language models (LLMs).
- 13** ➡ **Python**  Versatile programming language for developing AI-powered applications, data handling, and automation.
- 14** ➡ **LangChain**  APIs for directly accessing the capabilities of large language models like GPT-4 for seamless integration.
- 15** ➡ **AutoGen**  A low-code tool for creating AI agents with custom workflows and multi-agent capabilities.
- 16** ➡ **ChromaDB**  Open-source vector database for managing embeddings and similarity searches.

Here's what people have to say

2,000 Plus 5 Star Reviews From All Over The World

Jahn S.

@Jahn S.

Amazing to get started with chatgpt. Highly recommended

Denise H.

@Denise H.

Wow! This class was so thorough! If you are trying to learn Prompt Engineering, this is the course for you! You will come back to this course as a reference over and over again.

Glenn B.

@Glenn B.

This course will be my table book, i.e. it's gonna stay on my table and I'm gonna refer to it daily. Brilliant ideas, plenty of ready to use prompts, and detailed instructions.

Sriraj J.

@sriraj J.

Good job. Release a course for non programmers to build saas application from scratch and launch it. Make sure you provide steps to launch it.

Maggie R.

@Maggie R.

This course outline is a comprehensive outline of what follows in the course. As well as being informative, it gave me a feeling of excitement for what will follow.

Alexander M.

@Alexander M.

This course is great!!! The way Saad explains everything allows to non technical users to understand. I recommend it 100%

James R.

@James R.

The introduction was an absolute mouthful, making you feel complete and fulfilled. Let's move. And that is just the introduction.

Martina S.

@Martina S.

A very comprehensive and inspiring course. - Well done, thank you very much

About me

Hi, I am Saad. My educational background is in Data Science, Business, and Finance and I have a decade of experience working for Fortune 500 companies including Deloitte, PWC, BMO, and Microsoft.

I am passionate about harnessing the power of AI to make life easier for each one of us. Through my courses, I aim to provide insight into the evolving field of AI and keep you informed and engaged with the latest advancements in the field. Whether you are an expert in the field of AI or a curious beginner, these courses will offer you the guidance you need to stay on top of the latest trends and help you harness the power of AI to your advantage.

Our Instructors

SAAD AHMED

Saad Ahmed has a decade of experience as a Product Manager in the technology and financial industries, recently leading a \$5 MM portfolio as PM AI at BMO Capital Markets. He has worked with leading firms like Deloitte, PwC, and Microsoft, leveraging his expertise in AI-driven market risk management. With a strong educational background in data science, business, and finance, Saad has also shared his insights as a Udemy instructor, where his courses have reached over 14,000 students and earned more than 2,000 positive reviews. He is committed to using AI to simplify complex challenges and is passionate about keeping others informed on the latest advancements in the field.

RAHUL SHARDHA

Rahul Shardha has over a decade of experience in software engineering and leadership, currently serving as a Senior Engineering Manager at Symcor. He has held key roles at firms like Baseline and Intersect, where he focused on building and managing high-performance engineering teams. With a strong background in software engineering from the University of Waterloo, Rahul excels in delivering scalable solutions that drive operational efficiency. He is dedicated to fostering innovation and guiding his teams to build impactful technology solutions.

SPURRYA JAGGI

Spurrya is a software engineer with over 8 years of industry experience, including 4+ years at Nvidia's GeForce NOW. Specializing in software development, system optimization, and cloud infrastructure, Spurrya is dedicated to enhancing user experiences and advancing cloud gaming technology.

DANIAL KHERANI

Danial Kherani is an actuary with the Fellow of the Society of Actuaries (FSA) designation and over 8 years of experience in the industry. He has worked with companies such as Manulife, Milliman, and Somerset Re, gaining a broad range of expertise across both the insurance and reinsurance sectors. Danial focuses on asset-intensive reinsurance transactions, often contributing to mergers and acquisitions (M&A) activities. He brings significant experience in actuarial appraisals, helping to assess the value of insurance portfolios and reinsurance deals. Danial has also developed various tools for pricing life insurance products and improving actuarial processes. His technical skills, especially in building efficient tools for actuarial valuations, enable him to enhance the accuracy and efficiency of pricing models and valuation processes.

ZUBAIN

Zubain is a seasoned data professional with over 8 years of experience as a Data Analyst, Data Scientist, and Data Engineer across tech, banking, and insurance industries. He has a diverse international background, having worked in Belgium, the Netherlands, Canada, Japan, and Dubai, with a passion for leveraging the latest technologies to build innovative, data-driven solutions. Currently, as the Lead Developer at Jelloow, a Belgium-based marketing tech startup, Zubain focuses on data engineering and fullstack development to deliver intelligent marketing advisory services. Zubain holds a Master's in Mathematics and is a certified Professional Risk Manager (PRM).
